

A NEW WAY TO OPERATE

All your work in one app, run by an **AI that actually does the work.**

Email, chat, projects, files, CRM, calendar and more, under your company's brand.
With an AI inside that reads, organizes and executes alongside your team.

getmaaia.com

Let's talk on WhatsApp

Scan and message us

Everything you have scattered today, in one app under your brand.

For midsize and large teams. One workspace under your company's brand that brings together email, chat, projects, files, directory, CRM, calendar, notes, tasks and expenses. Inside lives Maaia, an AI that reads, organizes and executes alongside your team, not a chatbot that only answers.

Email

All your mailboxes in one inbox.

Chat

Team messages, voice and files.

Tasks

To-dos the AI creates and organizes.

Projects

Teamwork, without silos.

Notes

Ideas and minutes, always at hand.

Calendar

Your schedule and your team's.

Files

Documents in one place.

Directory

Your team and your contacts.

CRM

Customers and sales pipeline.

Expenses

Multicurrency: USD, MXN, EUR.

Announcements

Company-wide broadcasts.

Maaia AI

The AI that executes inside.

In real production

Not a concept, it's live.

Bilingual

Support and onboarding in English and Spanish.

In daily use

Our team and clients.

From the old way of working to the new one.

The classic stack (six to ten apps that don't talk to each other) can't keep up. Maaia Workspace brings it together in one app, under your brand, with a native AI inside that executes, not just answers.

✗ The old way

Silos everywhere

Email, tasks, notes, calendar, files and chat, each in its own tool.

AI that only answers

A chat box that summarizes but doesn't create, organize or execute anything for you.

Context that gets lost

Every app switch drops a ball. There's no single source of truth.

Costs that multiply

Every hire adds more licenses and spreads your spend across more tools as you grow.

With Maaia Workspace

One app, under your brand

Email, chat, CRM, calendar, tasks and more, all in one space.

A native AI that acts

Reads, organizes and executes inside your data. It doesn't just tell you what to do, it does it.

A single source of truth

Everything lives in one place; nothing falls between apps and context isn't lost.

Your own database

One subscription, isolated per company and under your control. Your logo and your domains.

1

one app that brings it all together, under your brand.

10+

modules that stop living in silos, plus Maaia inside.

Yours

an isolated database, under your control, not a shared pool.

We don't ask you to trust a promise. We run our own company on it.

Maaia Workspace is in real production, used daily by our own team and our first clients. What you see is what we use every day.

36

mailboxes in one inbox

In our own operation, a single operator manages them all from one view.

10+

modules in one app

Email, chat, tasks, projects, CRM and more, without app-switching.

100%

yours, end to end

Your brand, your domains and your own isolated database, not a shared pool.

Our own operation

36 mailboxes → 1 view

We used to jump between accounts and brands. Today one operator handles all 36 mailboxes from one inbox, with search by meaning.

Our first clients

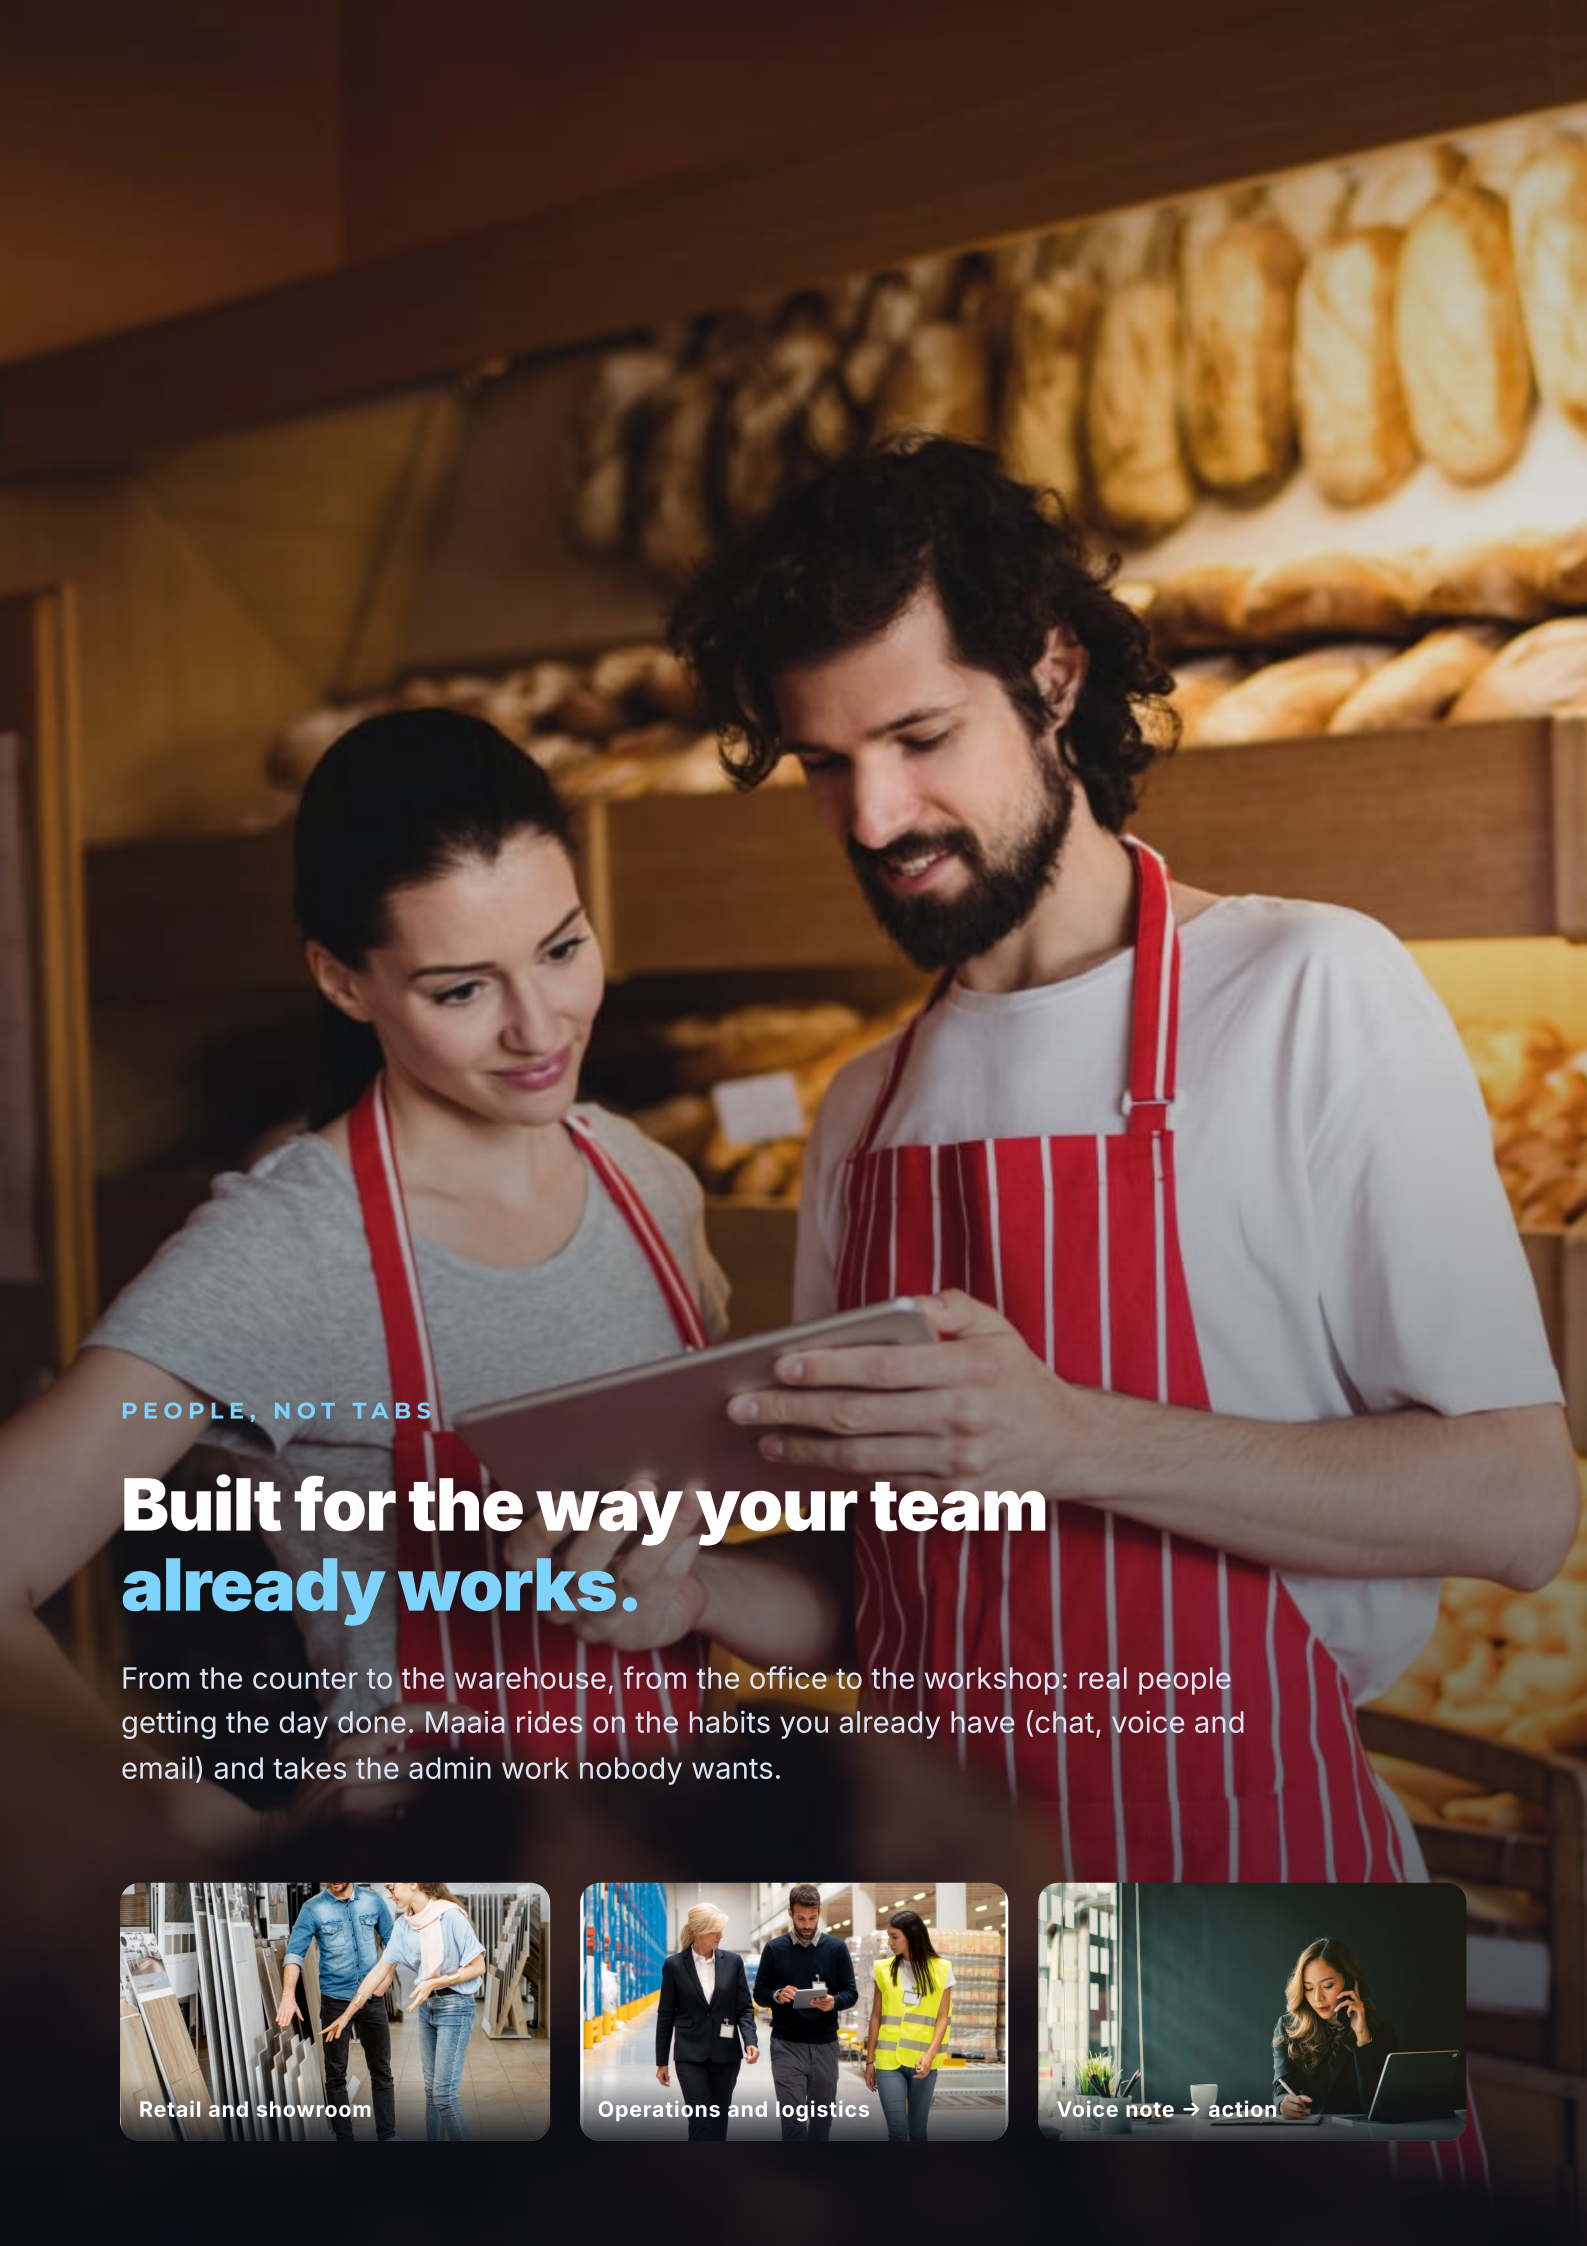

In daily use

Real teams run their day inside Maaia Workspace: email, chat, tasks and the AI executing beside them. We don't sell what we don't use.

The product sells itself the moment you see Maaia take action. That's why we'd rather show it than just describe it.

The Maaia team · in real production since day one

A man and a woman, both wearing red and white striped aprons, are looking at a tablet together in a bakery. In the background, there are shelves filled with various types of bread.

PEOPLE, NOT TABS

Built for the way your team already works.

From the counter to the warehouse, from the office to the workshop: real people getting the day done. Maaia rides on the habits you already have (chat, voice and email) and takes the admin work nobody wants.

Maaia truly executes, but you always **review and send**.

Maaia is your AI chief of staff, in four steps. It layers on top of what you already have instead of replacing it: we do the heavy lifting of the transition.

THE MAAIA METHOD, IN FOUR STEPS

1

Reads

Sees your email, chat, tasks and calendar in one system, and understands the context.

2

Understands

Keeps durable memory of your goals and brings the relevant context to every conversation.

3

Acts

Creates tasks, events, expenses and notes; organizes projects and transcribes voice notes.

4

You decide

For email, Maaia opens a pre-filled draft. A human always reviews and sends.

CONNECTS WITH WHAT YOU ALREADY USE

Your domains

Mailboxes on your own domains.

Google Calendar

Import your calendar.

Google Drive

Browse your files.

WhatsApp habit

Light chat, photos and voice.

ICS invites

Standard email calendar events.

Multicurrency

USD, MXN and EUR in expenses.

Time to value: we set it up for you. Every Maaia action is internal, scoped to the user and auditable; for email, it never sends anything on its own.

WEEK 0

We set up your space with your brand and migrate your mailboxes.

WEEK 1

We configure modules, roles and access, with hands-on onboarding.

LIVE

Your team operates inside Maaia, with the AI executing by your side.

Your own database, **not a shared pool.**

For your IT, security and legal teams, here's what matters, in plain language:

Dedicated DB

Isolated per company

2FA (TOTP)

Role-based access

Audit log

Viewer + CSV export

Vault

Zero-knowledge

A dedicated database per company

Every SMB and Enterprise client gets its own isolated database, not a multi-tenant pool. Your data never mixes with anyone else's.

Encryption at rest for sensitive material

We encrypt access tokens, two-factor secrets and vault contents at the application level.

Granular access control

Two-factor (2FA with TOTP) and role-based access, scoped by domain. You decide who sees what.

Auditable activity

An audit log with an admin viewer and CSV export. Maaia's actions are recorded.

Chat with visible governance

Direct messages are private; access only happens through a logged, audited legal hold. Company channels are owned by the company, governed and auditable.

You decide if the AI comes in

In direct messages Maaia is off by default. Your content is never used to train other companies' models or for advertising.

An honest note on chat and certifications

Chat uses enterprise-grade security (TLS in transit, encryption at rest for sensitive material, per-company isolation, access control and auditing), the same posture as Slack and Microsoft Teams. It is not consumer end-to-end encryption, and that is precisely the decision that lets Maaia read and act on your chat. We don't yet hold issued certifications; for Enterprise we work toward the compliance support you require, scoped by contract.

DPA + data residency + dedicated deployment · Enterprise

PLANS THAT GROW WITH YOU

Dedicated and branded today. Self-serve cloud very soon.

Maaia Workspace comes in tiers based on your company's size and needs. Pricing is defined by your scope, so finance gets a tailored proposal, not a generic rate.

AVAILABLE NOW

SMB (midsize business)

A dedicated, branded space, your own isolated database, your domain and your mailboxes. All modules and Maaia included.

AVAILABLE NOW

Enterprise

At greater scale: advanced administration and auditing, multi-brand email, white-label, priority support and compliance by contract.

COMING SOON

Cloud Solo and Teams

Self-serve subscription for individuals and teams, per-user pricing and sign-up in minutes. Join early access.

See Maaia take action. Let's talk today.

A 30-minute conversation with real cases from your operation. We set up your branded space, migrate your mailboxes and provide hands-on onboarding. We do the heavy lifting of the transition.
